

LÊ TUẤN ANH

Software Engineer | Fresher

ltuananh662003@gmail.com | +84 365 660 510 | github.com/LTBvn | Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Final-year Software Engineering student with 1+ year of hands-on experience building and shipping production-grade mobile and web applications. Comfortable working across the full development stack — from designing intuitive UIs to integrating APIs and modelling data. Experienced collaborating in Agile teams for both domestic and international clients, and eager to grow as a generalist Software Engineer.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Java, C#, Dart (Flutter)
Mobile / Web	React Native, React, Ionic, Flutter, HTML5, CSS3
State & Storage	Redux, Context API, AsyncStorage, Firebase
Backend & APIs	REST API, Axios, Laravel PHP, Odoo ERP
Databases	SQL, Oracle Database
Tools	Git, GitLab, Figma, Adobe XD, StarUML, Draw.io

PROFESSIONAL EXPERIENCE

Software Engineer Intern · MEU Solutions

HCMC | Jun 2025 – Dec 2025

Project: LearnIP – Mobile Learning Platform

- Architected and built core screens (Onboarding, Auth, Home, Search, Profile) in React Native + TypeScript using a component-driven approach.
- Integrated REST APIs via Axios, managed global state with Redux + Context API, and persisted session data using AsyncStorage.
- Wired up Firebase for push notifications and real-time data sync across exam and course modules.
- Ensured cross-device responsiveness for varied screen sizes; participated in daily standups and code reviews under Agile workflow.

Project: Supermarket E-Commerce – Web Platform

- Built responsive product listing, cart, and checkout flows in React, connected to inventory and order management APIs.
- Implemented search, filtering, and category navigation; collaborated closely with the backend team on data contracts.

Software Engineer Intern · Eclo Co., Ltd.

HCMC | Aug 2024 – Dec 2024

- Designed and delivered mobile application UIs for international clients using React and Ionic framework.
- Integrated Laravel-based REST APIs, ensuring consistent data flow between client and server layers.
- Improved UX through iterative design reviews, contributing to higher client satisfaction scores.
- Participated in Agile ceremonies and cross-functional team meetings; practised professional code review processes.

KEY PROJECTS

- Bali Driver App** · Car Rental Platform · React (Ionic), Laravel API, Figma

Sep – Nov 2024

 - Built a bilingual car rental app for international tourists in Vietnam, focusing on simplicity and trust for non-Vietnamese speakers.
 - Integrated secure Laravel APIs for booking management, driver coordination, and payment processing.
 - Led UI/UX design in Figma and ran end-to-end testing to ensure reliability before launch.
- Car Selling App** · Online Automotive Marketplace · Flutter, REST API

Jun – Aug 2024

 - Developed a full-featured vehicle marketplace app with browsing, advanced search, and purchase flow using Flutter.
 - Established frontend–backend connectivity via REST API; collaborated with team on data modelling and API contracts.
- ERP System – Nike Shop** · Odoo ERP, StarUML, Draw.io

Jun – Aug 2024

 - Designed system architecture including workflows, database schema, and process diagrams for an online sportswear retailer.
 - Implemented order management, product catalogue, and CRM modules in Odoo ERP.
- Quran Reading App** · Educational App · React (Ionic), Figma

Aug – Sep 2024

 - Designed and developed frontend for a Quran reading and study scheduler, emphasising accessibility and clean UI.

EDUCATION

Bachelor of Information Technology – Software Engineering · HUFLIT HCMC | 2021 – 2025
Coursework: Data Structures & Algorithms, OOP, Database Systems, Software Engineering, System Analysis & Design

CORE COMPETENCIES

Technical Mobile & web development API integration & state management ERP & system design	Professional Agile / Scrum workflow Cross-functional collaboration Client communication	Personal Analytical problem-solving Fast learner, adaptable Detail-oriented, quality-focused
